Greenwood Moss Jungle,
project: Bar Tangente Aachen, photo: Andreas Schwarz

Freund Moosmanufaktur is a permanent part of **Freund GmbH**. As experienced trading partner and manufacturer of decorative materials for wall coverings, we were looking for vertical indoor greenery, which does not need care or watering. In 2007, we had achieved our first positive results by making moss durable, therefore creating an indoor vegetation solution with moss pictures and moss walls, accessible for a broader public. Since 2008 we are on the market with our moss products, and as one of the first manufacturers in Europe, have co-founded the trend of natural indoor moss walls.

Since 2008 we have been on the market with our moss products, and as one of the first producers in Europe we have sparked this trend of natural indoor moss walls.

For the production of our green wall elements we use only real mosses and plants. Right from the start of production we pay special attention to sustainability: Only individual moss areas are harvested - and this is done manually and with great care, so that the growth of natural resources is not affected.

The natural moss is cleaned in a resource-friendly way and conserved, it then gets its intense colour by natural colourants, which we then turn into our key products **Evergreen Moss** (reindeer moss), **Greenhill Moss** (bun moss), and **Greenwood Moss** (forest moss).

The moss types Evergreen, Greenhill, and Greenwood, differ in look and feel:

Evergreen Moss
 Soft reindeer moss with a sponge-like texture

Greenhill Moss
 Round cushion moss (also bun moss) with 3D optics

Greenwood Moss
 Short, flat forest moss – Combines perfectly with ferns, etc.

Especially Evergreen Premium moss impresses with its unique soft feel, photo: Corinna Jacobs

Thanks to a special procedure for the preservation of our natural materials they retain their fresh green colour. In the next stage, we use our moss factory to handcraft unique moss pictures and walls. We always keep in mind to ensure that the elements are easy to install and that our customers get a detailed project consultation.

Of course, we also produce more complex customer ideas, such as cladding of columns, large objects or even entire cubes (mitered).

The evergreen elements are exceptionally impressive within an indoor space, when various moss types are combined or unique variants are used.

Considering the manual and delicate labor that goes into the production, we can literally be called a manufactory. Our moss products are exclusively produced in Germany.

IHRE VORTEILE:

-  100 % natural moss
-  Made in Germany
-  Sound isolating
-  No upkeep
-  No maintenance
-  No follow-up costs
-  Easy to install
-  No watering

Evergreen Moss Premium, colour: moss green, project: Acoustically effective moss columns at FUNKE newsroom offices

The evergreen moss pictures and walls made of **Evergreen Moss Premium** are the highlight in your spaces and do not require any light, watering or feeding. Those features currently make our dense evergreen wall panels one of our most sought after products.

Through its subtle texture and big surface that evolve out of it, the moss florets appear very soft and "fluffy." The viewer is naturally inclined to touch the soft moss pictures and walls and explore the different sensations of the natural moss on their skin.

SURFACE TEXTURE

Florets out of reindeer moss approx. depth 40 – 50 mm
laminated and tacked onto
MDF mount approx. depth 10 mm

EVERGREEN Moss PREMIUM

- **Unique manufacturing:** We double-attach the Evergreen Moss Premium
- Individualized to customer requirements, tailor-made design
- Excellent pattern repetition
- Standard sizes available, round and square
- Optional individual forms (e.g., room divider, world map, free form, 2D, and 3D versions, etc.)
- Optional moss frame and split battens
- Available in 15 colours
- Fire protection B1 upon request
- Sound absorbing up to 90 %
- Carrier exchangeable (fulfills the requirements for fire protection, moisture resistance and flexibility)

CERTIFIED FOR ACOUSTICS AND FIRE PROTECTION

The sound absorbing properties – approximately 90 % –, as well as fire preventive features of our moss, have been confirmed and certified by various laboratories.

Sound absorption certificate

B1-certificate

CHOOSE BETWEEN 14 COLOURS

Standard colours

Sonderfarben

* The reindeer moss is a natural material that can be dyed in different colours. Because moss is a natural product and because of its presentation (e.g., indoor, outdoor, different lighting and so forth), the actual colours might differ from the images.

PROJECT AIRPORT MUNICH

Evergreen Moss Premium moss wall, project: Airport Munich, photo: Diether Kinzel / Trick17

B1 CERTIFIED · ACOUSTICALLY EFFECTIVE

From small moss picture to a large surface area: **Evergreen Moss Premium** has a calming effect, regulating indoor climate and absorbing sound.

For a more natural look, it is also possible to cover the frame of your moss picture with moss instead of aluminum or wood. For this, the moss is pulled over the edges, which gives the impression of moss growing directly on the wall.

Evergreen Moss Premium, without moss on the side panels

Evergreen Moss Premium, with optional moss on the side panels (moss frame) (photo: Kompe)

Additionally, you can order split battens from us so the green "artworks" can be installed quickly and directly onto the wall.

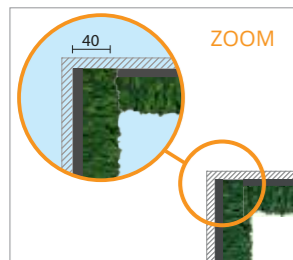

Split battens

CORNER SOLUTIONS

If the **Evergreen Moss Premium** is mounted onto objects with more than one side, which is leading to corners, a few things must be considered:

Inner corner:

An MDF mount is directly fitted to the wall, the other carrier panel is about 40 mm smaller to prevent that the moss is pressed against each other.

Outer corner:

To avoid a visible panel corner, one of the moss panels is produced cantilevered 30 mm to the other carrier panel, which will be covered with moss on the sides.

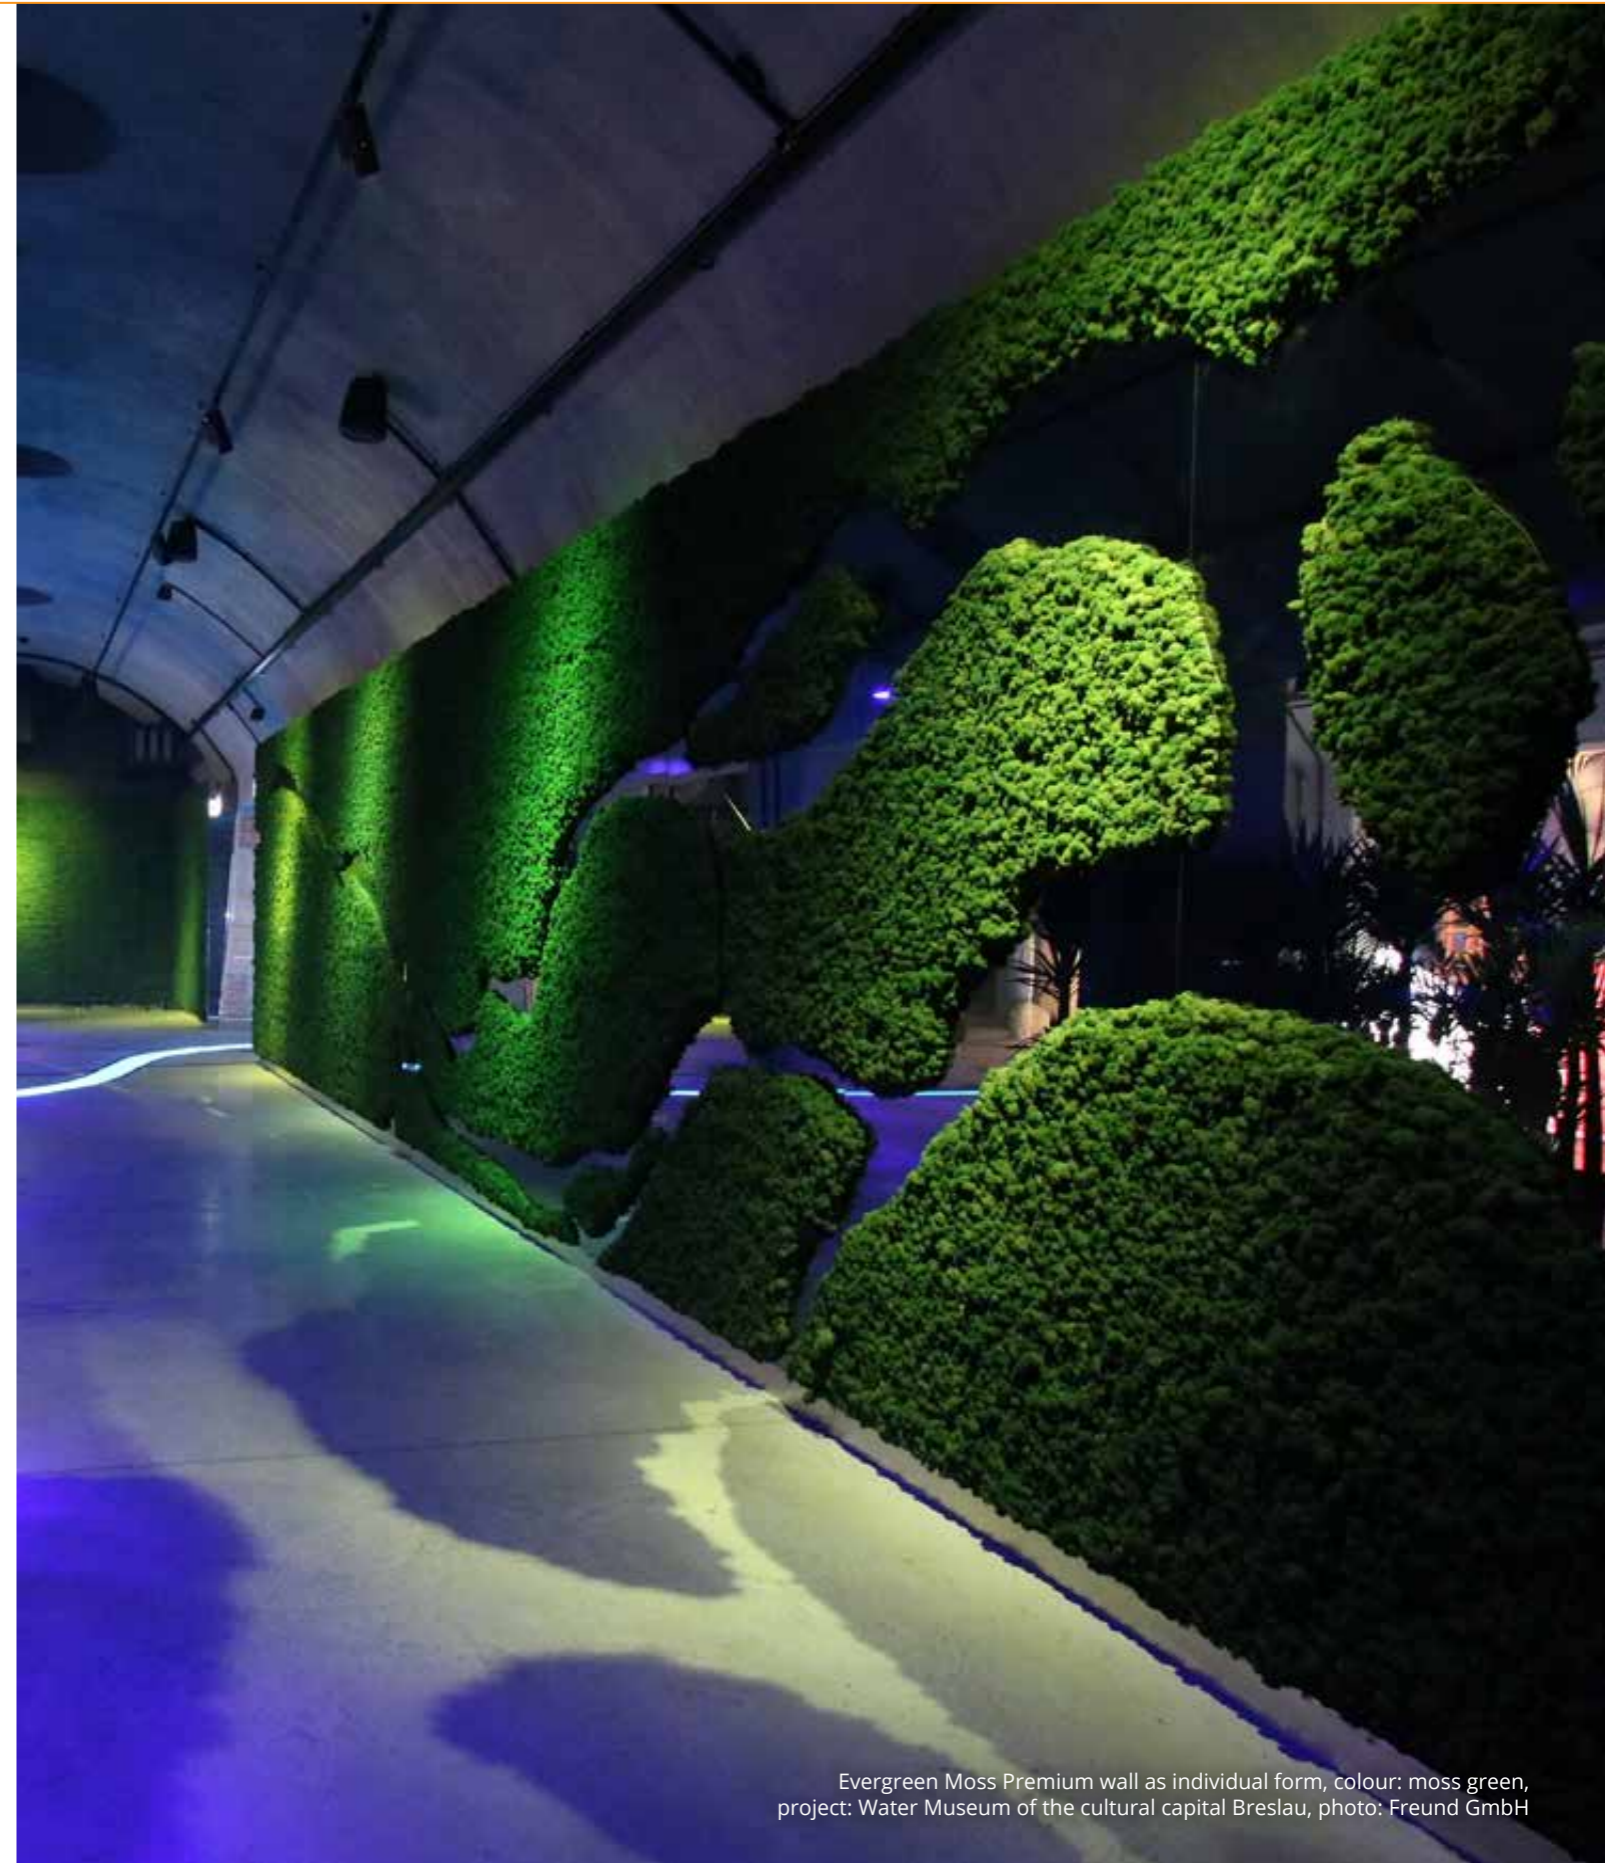

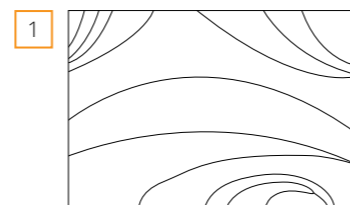

MULTICOLOURED MOSS PICTURES

It is also possible to create different-coloured pictures made of moss, for example, based on a vector file. This leads to wide-ranging design possibilities regarding individual corporate design requirements.

We are happy to help you with the technical preparation and realization.

Right (from the top down):

- 1 Vector file
- 2 Colourised vector file
- 3 Finished picture with four different moss colours

A real alternative to “do it yourself” moss installation are our product solutions **Evergreen Moss Standard** and **Evergreen Moss Flex**: Both products are ideal for easy self-assembly. The panels can be applied flat, in convex or concave form around objects or as a normal moss wall.

The **Standard** panel can be easily bent, while the **Flex** panel can be applied around even rounder objects due to its flexibility. This means there are no limits to your own creativity in decorating rooms with moss.

Easy installation of the moss panels is guaranteed: They are attached to a wooden subsurface with a stapler (an electric one for instance), screwed together or directly glued. One Evergreen Moss Standard box includes five panels, (1,1 m²). The Evergreen Moss Flex panels are single-packed.

Due to the curved material, the moss panels can be used in various ways: around corners or on bulges like columns, on walls or counters, with a moss border or frame – there are almost endless creative possibilities.

You can cut the panels with simple tools (like a cutter knife) according to your wishes and needs.

The standard sizes of the single panels make storage and transport easier. This is the reason why we are able to deliver our **Evergreen Moss Standard** or **Evergreen Moss Flex** for your project relatively short-notice. This flexibility is especially appreciated by our customers.

GREENHILL MOSS PREMIUM

Whether as small moss picture or covering an entire wall: **Greenhill Moss** objects are always a green work of art. The round cushion moss is popular when creating extravagant walls, ceilings, and object designs.

The sound-absorbing qualities of the moss pictures significantly contribute to your well-being, in your private living space or your working area.

Upon request, Greenhill can be individually designed by us and for example, create an impressive 3D effect on curved carrier elements.

For the LEMKEN AGROFARM project, **Greenhill Moss Premium** was used by Freund Moosmanufaktur to create perfect wellness oases within a modern office space. In line with this, the corporate design was brought into a natural context.

Large wall pictures create a calm and comfortable feeling within the otherwise sober meeting rooms. An oversized picture made from Greenhill Moss, which is located in the lounge area, impresses employers and visitors alike.

The individually designed moss letters in the lobby of the large company, located in the Westphalian Alpen, are the real highlight.

GREENHILL MOSS PUZZLE

THE PUZZLE SYSTEM

With this Freund product, we pass on the added use as well as value to our clients and their projects.

The **Greenhill Moss Puzzle** conceals the cushion / bun moss, which is mounted on 5 mm strong MDF-panels.

These are produced as systems and made up of **middle pieces**, **edge pieces** (in two sizes) and **corner pieces**. Uniting the individual modules allows an assembly without visible edges or transitions.

THE DIMENSIONS

Middle panel: 890 x 556 mm (0,5 m²)
 Long edge panel: 853 x 118 mm
 Short edge panel: 118 x 523 mm
 Corner: 115 x 84 mm

Greenhill Moss Puzzle, colour: moss green – single elements

Greenhill Moss Puzzle, colour: moss green – joined elements

GREENHILL MOSS PUZZLE

- Acoustically effective
- No transitions: joint free installation of the puzzle system
- Swift assembly: installation of a 10 m² surface in around 4 hours
- Colours: moss green and apple green
- Short delivery time in stock, thus, available
- Carbon neutral piece by piece

PIECE BY PIECE: CO₂ NEUTRAL TOGETHER

1 m² rainforest offsets approx. 100 kg CO₂ every year.

Saying 'Save the rainforest!' might be a bit old hat. But still, rainforests are the lungs of the earth. Ever since humans started using wood as a raw material, the tree population has been decreasing.

With our new product, you're working with us to help save the rainforest in western Canada. It works like this: in **Wilderness International**, we've found a trusted partner whose goal it is to preserve unique wilderness areas for future generations.

NO TRANSITIONS

SHORT ASSEMBLY TIME

GREENHILL MOSS PUZZLE: BECAUSE NATURE MATTERS

Over an area of 128 m², western Canada's temperate rainforest sequesters around 13 tonnes of CO₂. That's about the average annual consumption of one European. This is why retaining this complex ecosystem is so important.

As a company, we want to make our contribution. In Wilderness International, we've found a trusted partner working to preserve unique wilderness areas for future generations.

In 2019, Freund GmbH offset the carbon footprint of its Berlin office, meaning our work in the Goerzwerk Berlin was carbon neutral for the year. But there's still plenty more to do. **By 2030, we want all of the production in our manufactory to be carbon neutral.**

CARBON NEUTRAL PIECE BY PIECE

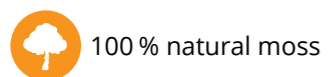

JOIN US IN THIS VITAL MISSION!

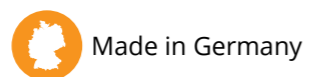

By purchasing 1 m² of our GREENHILL MOSS PUZZLE, you're joining us in protecting 1 m² of rainforest.

For projects of 10 m² or more, we'll issue you a certificate with the geographic coordinates of the protected area. Please get in touch with us if you'd like further information.

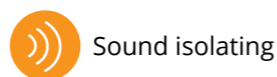

Please see www.wilderness-international.org for more information about the vital work of this Berlin- and Dresden-based organisation.

GREENWOOD MOSS MAINTENANCE-FREE MOSS AND PLANT WALLS

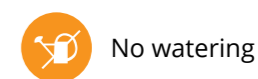

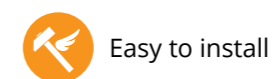

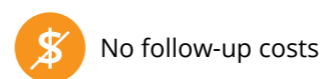

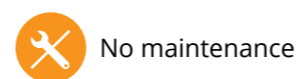

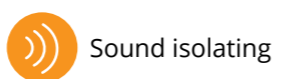

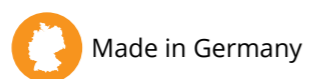

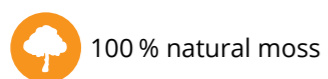

Greenwood moss pictures and moss walls are made from genuine low-grown forest moss.

By adding cushion moss mounds, preserved plants and different grasses to our Greenwood Moss walls, you can create anything from a unique woodland texture right through to a real jungle feel depending on the variety and density.

Our moss and plant walls are produced by hand in Germany and can be mounted on walls, floors or even ceilings.

APPLICATIONS: CEILINGS, WALLS AND FLOORS

Every time you look at it, **Greenwood Moss** invites you to pause, breathe deeply and be still. Our forest moss also fosters an earthy, primal feeling of well-being.

Our evergreen forest moss pictures and walls can be produced flat (2D) or undulating (3D) as required and can be combined with other materials.

They create an authentic forest atmosphere, fostering relaxation in hotels and spa and wellness facilities, as well as in restaurants and cafés.

Components:

GREENWOOD MOSS

- Moss wall of forest moss
- Smooth surface without undulation
- Individually prepared to precise customer specifications, excellent pattern repeat
- Standard sizes available, round/square
- Custom shapes as an option (e.g. room divider, map of the world, free-form)
- With optional moss edging
- B1 fire resistance on request
- Sound absorbent
- Works well combined with
 - mounds
 - other mosses
 - ferns
 - preserved plants, flowers and woods

(see **Greenwood Moss Extra** to **Greenwood Moss Jungle**)

Greenwood Moss wall, custom design, project: Connect Sense Offices, photo: Meik Terrahe

Moss walls and pictures in **Greenwood Moss Extra** also have a base of genuine low-grown forest moss.

Adding individual moss mounds produces a different texture that is more strongly reminiscent of forest floors.

With this woodland feel, you can create an authentic forest atmosphere on the floor, the ceiling or even the wall in restaurants and cafés, for example. Spa quiet rooms or hotel dining rooms, too, can benefit from the pleasant atmosphere engendered by an area of Greenwood Moss Extra.

Components

GREENWOOD MOSS EXTRA

- Moss wall with forest moss base
- Additional cushion moss (max. approx. 1/4 of the area per m²)
- Individually prepared to precise customer specifications, excellent pattern repeat
- Standard sizes available, round/square
- Custom shapes as an option (e.g. room divider, map of the world, free-form)
- With optional moss edging
- B1 fire resistance on request
- Sound absorbent
- Works well combined with
 - mounds
 - other mosses
 - ferns
 - preserved plants, flowers and woods

(see **Greenwood Moss Extra Plus** to **Greenwood Moss Jungle**)

Greenwood Moss Extra, moss picture, private dwelling, photo: Stephanie Sarg

GREENWOOD MOSS EXTRA PLUS

For our next level of intensity, **Greenwood Moss Extra Plus**, which also shares a base of genuine low-grown forest moss, we use additional ferns to produce an enhanced impression of forest floor undergrowth. Alternatively, you can also increase the ratio of Greenhill Moss mounds.

GREENWOOD MOSS EXTRA PLUS

- Moss wall with forest moss base
- Additional cushion moss (max. approx. 1/4 of the area per m²) and small ferns, or double the amount of cushion moss
- Individually prepared to precise customer specifications, excellent pattern repeat
- Standard sizes available, round/square
- Custom shapes as an option (e.g. room divider, map of the world, free-form)
- With optional moss edging
- B1 fire resistance on request
- Sound absorbent
- Works well combined with additional
 - ferns
 - preserved plants, flowers and woods

(see **Greenwood Moss Forest** to **Greenwood Moss Jungle**)

Freund exhibition booth at the IMM Cologne, photo: Tradephoto Dariusz Lech

What type of moss is used in the moss pictures and moss walls created by Freund ?

Here at Moss manufactory we only work with real moss. For Evergreen Moss Premium, Evergreen Moss Standard and Evergreen Moss Flex, we use a reindeer moss, for Greenhill Moss a cushion (bun) moss and for Greenwood Moss a forest moss. The moss is cleaned, partly dyed, preserved and then attached to a carrier panel.

What is the depth of the moss pictures and moss surfaces?

We usually use an 1 cm strong MDF mount as foundation, on which the approximate 3 to 7 cm thick and preserved moss is attached to. This base panel can also be changed upon request.

When ordering Evergreen Moss Premium, Greenhill Moss or Greenwood Moss, a moss frame, which overlaps the panel corners by 3 cm, and the individual split battens can be ordered upon request.

What is a moss frame?

The moss is arranged neatly around the corners of the MDF mount, this ensures that the panel itself cannot be seen anymore.

What exactly are fixing strips?

The split battens allow you to easily mount and remove the moss to and from the walls. One batten is already attached to the back of the moss panel, the respective batten for the wall is included as well. Another option is to mount the moss surfaces directly onto a carrier panel.

Which shapes and sizes are available?

All shapes and sizes are possible. 2D as well as 3D. We individually design your project and, as the manufacturer, we can realize almost every idea you have.

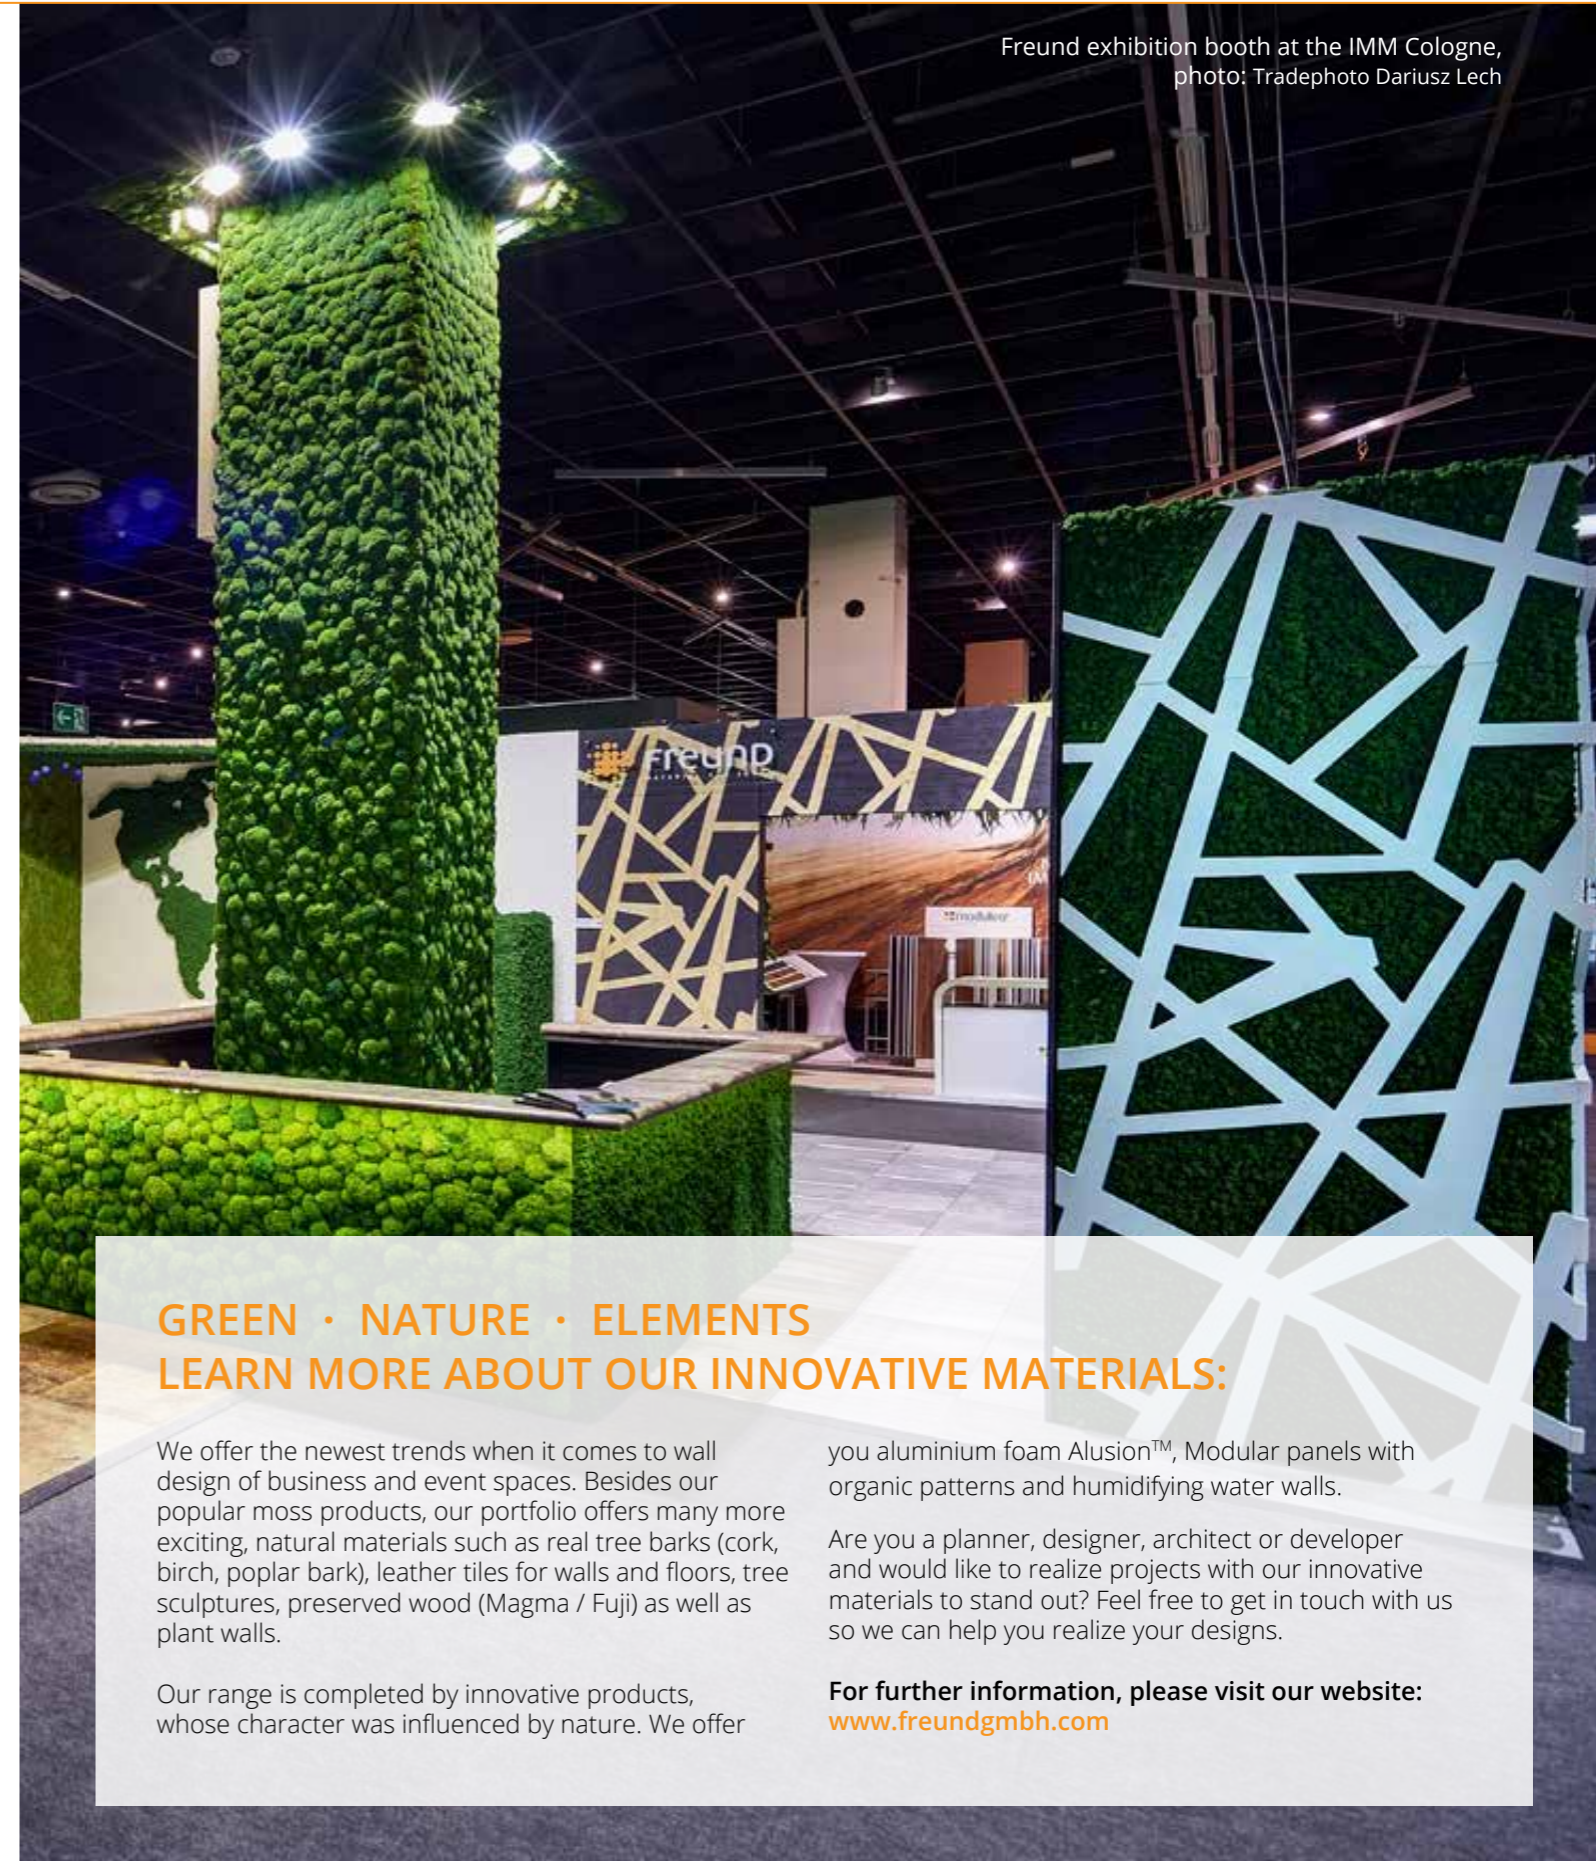

Do the moss pictures and walls need any special maintenance?

None of our moss pictures and moss walls need any grooming, watering, lighting or feeding.

For all our moss products we recommend a room humidity between 40 and 60 % to preserve its haptic and optical features. If the humidity drops below this recommended threshold, a change in the moss texture can occur. Dry air during the winter can make the moss thicker and therefore change its haptics. The moss will become soft and fresh once the humidity returns to its recommended levels. Please note that moss is a natural material. Due to the characteristics of the moss and the presentation, the colours in the photos may vary slightly.

Where can you buy our moss pictures and walls?

You can get all the unique pieces presented here at Freund GmbH and its partners only. Since 2008, we are the manufacturer and vendor of the Evergreen Moss (Premium, Standard and Flex), Greenhill Moss (Premium and Puzzle) and Greenwood Moss products.

GREEN · NATURE · ELEMENTS
LEARN MORE ABOUT OUR INNOVATIVE MATERIALS:

We offer the newest trends when it comes to wall design of business and event spaces. Besides our popular moss products, our portfolio offers many more exciting, natural materials such as real tree barks (cork, birch, poplar bark), leather tiles for walls and floors, tree sculptures, preserved wood (Magma / Fuji) as well as plant walls.

you aluminium foam Alusion™, Modular panels with organic patterns and humidifying water walls.

Are you a planner, designer, architect or developer and would like to realize projects with our innovative materials to stand out? Feel free to get in touch with us so we can help you realize your designs.
